growing fields at our

ERIE SHORE FARM

MIDDLE RIDGE ROAD

MADISON, OHIO

**"If You Deal With The Lowest Bidder
- Add Something For The Risk You
Run ... and ... If You Do That, You
Will Have Enough To Pay For Some-
thing Better!"**

-John Ruskin

A S Ruskin says — when buying from the lowest bidder, add something for the risk you run. Sure — you can get a bargain once in a while, and you should take it when the chance comes, but for steady reliable good quality merchandise, you usually have to pay going prices — not bargain prices.

We try to deliver high quality, well grown bulbs. We shall continue to do this and if our prices are not in the so-called bargain price group, you can expect to get a better quality bulb than a bargain priced bulb.

Frankly, it costs more, in more ways than one, to raise a high quality bulb. Fertilizer, irrigation, spacing in the field, care in digging, cleaning by hand, these are just a few of the items entering into the cost of a well grown bulb. Sure, you can skimp on some of the items, but only at the cost of the quality.

Earl E. Platell

"Uncle Geo."

UNCLE GEO. as he is known to his friends is G. W. Wilson, of Lisbon, Ohio. Uncle Geo. had the doctor tell him "To take it easy" so it was just natural for us to take over the growing of his stock. His 103 introductions indicate that he has more than a flair for hybridizing. He has been working to develop a long ribbon of bloom and has been remarkably successful in doing so. Many of his introductions are still listed, many of them are hard to beat on the show table, and still others are stand-by commercials.

We feel honored to be able to work with Uncle Geo. and will have a full line of his varieties in all sizes in another year. Please bear with us this year as we do not have the full list in sufficient quantities to fill all your requests. LADY CHARMER and GOLD MINK cannot be listed this year due to an accident. We should have them next year and better yet, we should have several of his new ones to introduce.

You will find his varieties throughout our catalogue — they were all grown from his stock — you can buy with assurance — in many cases you are getting potential champions.

OUR NEW FARM

Early in the year we purchased more ground. Our property at Aurora was getting too expensive to operate for growing bulbs. We have 75 acres of sandy loam soil, plenty of water to irrigate and all the necessary equipment, tractors, storage facilities, truck, etc. We have been able to expand our operations considerably and at the same time raise just as good a bulb as we did at Aurora. Most of the operations have been moved to the new farm. Shipment may be made from either the farm at Madison, Ohio or from our home at Aurora, Ohio. Our new farm, being located close to Lake Erie gives us about six to eight weeks more growing time, a month in the spring and a month in the fall. Size one from bulblets was common—especially on some varieties. We feel that we can offer much better service and as good or better quality than we have been giving you in the past.

Trays

For Seeds:

We can get around 35 size three or four bulbs from one of our five by seven trays, provided we start the seeds inside, about four to six weeks ahead of our regular planting season. The extra six weeks growing seems to add at least one size to our results.

We use a light weight pressed wood tray, looks like paper mache but actually is pressed wood. The trays we use have a ledge around the top, about $\frac{3}{4}$ of an inch down. We put good garden soil in the tray up to the ledge, plant our seeds on top of the soil and then put about $\frac{3}{4}$ of an inch of sand (lake sand, building sand) on top. The sand absorbs water easily, lets it percolate down to the seed readily.

Some three weeks after the seed is planted, you will see sprouts coming through. In another three weeks, the roots will begin to work through the tray — then it's time to put the trays in the garden or the cold frame. You have a little latitude — you can wait for a nice day but the trays should be in the garden about six weeks after planting. If May 1st is your planting date, you can start your seed about the middle of March.

See that you have a loose friable soil ready for the trays, nestle them in and bring the loose dirt right up to the top of the trays. Keep them well watered throughout the summer and in the fall, you will be surprised what nice seedling bulbs you have. Many of the bulbs will have worked through the trays into the ground underneath, so watch carefully when digging.

Some crosses naturally will produce larger bulbs than other crosses but you will find that the extra six weeks is well worth the time and expense.

For Bulblets:

For those hard to germinate bulblets — try planting them in trays and handling like you do the seeds only in the case of some bulblets, you can plant eight to ten weeks before you expect to be able to put them outside. Plant them just like the seed, fill the top $\frac{3}{4}$ " with sand. Keep watering them until you get a good stand showing through and then put out in the garden. For bulblets of those you can't seem to germinate, try this method. 15 to 25 bulblets to a tray, depending on how valuable they are.

We are not trying to push the sale of these trays but are trying to help you get better results. We handle them more as an accommodation — they are priced 10 for \$1.00; 50 for \$4.00; 100 for \$7.00. Ten trays weigh about a pound when packed with bulbs, but if shipped separately, better figure two pounds for ten trays.

Transportation

One of our big expense items is postage and express on our orders. We have concluded that it is best for each to pay their own transportation charges, then the man living close by is not paying part of the cost of the transportation for the man living a long way away.

Will you therefore please include postage with your remittance. Help us to help you by keeping our prices down as low as possible, consistent with good quality.

To figure your postage on an order, count the number of large, medium and small bulbs you have ordered and use the table below, i.e. fifty large bulbs packed for shipment would weigh about 8 pounds, 25 medium bulbs would weigh about 2 pounds. We will include extras if you miss your estimate by a small amount, or we will refund any sizeable overpayment. Aurora is about 25 miles southeast of Cleveland, Ohio.

Approximate weight packed and ready for shipment

	Large	Medium	Small
ten bulbs	2#	1#	½ #
twenty five bulbs	5#	2#	½ #
fifty bulbs	8#	3#	½ #
one hundred bulbs	10#	5#	1#

C.O.D. orders must be accompanied by at least a 25% down payment.

TREATMENT

For small lots of bulbs we would recommend a treatment of Arasan and DDT. Eight ounces of Arasan to 10 pounds 5% D.D.T. well mixed together. Arasan for a disease prevention and DDT for thrip. A spoonful or so of the dust with a few bulbs in a bag will coat the bulbs and give good protection. For larger quantities, we use New Improved Ceresan in a 15 minute dip — just before we plant in the field. The latter is rather messy, particularly for small lots. Either will give good control.

For thrip control we tried Aldrin — 2 to 3 pounds to the acre before planting. Apparently, that gave full control of thrip without further spraying or dusting for the entire season. At the NAGC convention last year, several growers reported very good results from such a treatment. We tried it and will also report excellent thrip control without further spraying or dusting. Aldrin will also help control wire worms, grubs, etc.

EARLY ORDERS

This last year we started planting on March 9th so you can see why we ask for your orders early in the year. Our stocks are full and we have no trouble filling orders for various sizes up to that time, but by the first of April, some of the varieties or sizes will be depleted. We can give your order better attention early in the year — we have more time to select the best bulbs — so try to get your order in early for you will help us very much when you do.

SHIPPING

We can ship express practically any time within reason, but most parcel post orders are shipped in March or April. If you want your order early, have it shipped by express. Help us by showing the approximate date you want to get your bulbs. You know your local conditions better than we do — so help us that way.

PLANTING INSTRUCTIONS

Planting instructions will be included with all shipments. This will be the latest up to date information available, written by experts—published by the North American Gladiolus Council.

SUBSTITUTIONS

We might as well be frank on the substitution situation. No one likes to substitute and no one likes to get a substitution, but there are certain limitations that are hard to overcome. A small 25c item that we cannot fill on an order makes it almost prohibitive to refund, and we would probably substitute. We will not substitute on anything but small items. On the early orders there is seldom any reason to substitute and we do not run into much trouble until the middle or end of March. After that time it becomes increasingly difficult to fill all items as ordered. Therefore, on all orders received after March 15th, unless you specifically request us not to do so, we will substitute size, but not varieties. After April 1st we will substitute size first and then varieties. You may be sure of one thing, though, we will give better value in the substitution than the one originally ordered.

SALES TAX

We have been advised by the State Tax Commission that we will have to collect 3% sales tax from all Ohio customers. Please include the amount with your order unless you have an exemption certificate.
PLEASE NOTE THIS APPLIES TO OHIO CUSTOMERS ONLY.

EXTRAS

Each year we put a note in the catalogue, asking that you mention an extra or two that you might like to receive. We can't always give you what you might like, but the mention of an extra at least helps us to decide what you are interested in.

There has been considerable talk among the growers of doing away with the giving of an extra. In fact, some growers are doing this right now but for our part the idea of putting an extra in the order is two-fold—one to give you a chance to look at some variety we think is extra nice, and second, to sort of say "thank you" for your order.

So—please list a few names of some varieties you might like to have—it will help us ever so much.

GUARANTEE

We guarantee our bulbs to be true to name and free from disease or thrip. If any of our bulbs are found not to be as represented, we will either refund your money upon their return or we will replace the unsatisfactory stock. We cannot, at any time, be responsible for more than the original amount paid for the bulbs. Due to conditions beyond our control, we are not responsible for the growth of bulbs or bulblets. All orders are placed with this understanding.

Please open package immediately upon its receipt. Examine carefully and if not satisfactory, advise us at once. We admit we make mistakes once in a while, but we are ready to adjust them without complaint. Both the field and the bulbs in storage have been state inspected, which with our own rigid inspection, makes us feel sure of our stock.

BUY AMERICAN GROWN BULBS

ABU HASSAN (K&M 47)**80 days****378**

One of the most wanted kind by arrangers. Just what I need—Can I have a few of that—What a beautiful color—those are just a few of the remarks. Deep violet in color, with buds that are almost black before they open. Tall straight spikes with about five open. Certainly one of the most useable when working in the dark colors. A few in a bouquet seem to bring out a lot of color in the other spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

AUREOLE (Pruitt 49)**80 days****410**

One of the cleanest of the light yellows, almost a self color. Its ruffling takes away any plainness, and adds a lot to the overall beauty. Spikes are only medium tall, but always straight, with from four to six open and about 18 buds. Plenty of large bulblets which germinate and grow nicely. A very useful commercial and a good one to have around the house.

Price—L 2/25c—10/\$1.00; M 2/15c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

ATHENA (Koerner 45)**75 days****366**

Butterfly shaped florets, with considerable lacination. Could easily remind one of an orchid. An odd color, lavender, shading darker to the edges, with a dark blotch in the throat. Here too, we have that orchid reminder. Will only hold four open and the spikes are not too tall. Mostly used for corsage or arrangement work.

Price—L 2/30c—10/\$1.20; M 2/20c—10/80c;

S 4/30c—10/60c; B 25/25c

ATLANTIC (B&P 46)**75 days****422**

More red than orange in our opinion, but a good steady performer—a consistent producer of better than average spikes. Vivid red orange with eight open a common occurrence, tall straight spikes of excellent proportions. A good show glad and a very good commercial. Florists like it for its color and its long straight spikes. A little slow propagating.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

APPLE BLOSSOM (Baerman Fischer 56)**70 days****460**

See All America Gladiolus for description, etc.

ATATURK (Salman 51)**75 days****354**

If you are interested in black red coloring, by all means take a look at Ataturk. A real black red, with a leaning toward the black side, a clean velvety texture leaves very little to be desired. Holds six open on medium to tall wiry spikes. Somewhat on the hard side to propagate, but worthy of your consideration.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;

S 3/25c—10/60c; Bblts 20/25c

ALISON (Coombs 50) **90 days** **506**

A regular producer of an extra nice spike of pale delicate cream with a deep cream marking on the lip petals. Florets will average about six inches in size—six open on tall 19-20 bud spikes. Clean growing and a good propagator. Well liked by the florists.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;

S 5/25c—10/40c; B Pkg. 25c

A. B. COUTTS (Coutts 53) **85 days** **516**

A buff colored floret, half way between peach and apricot in color but with a very clean smooth appearance. Shades to a deep yellow in the throat. Grows tall straight spikes with 20 to 24 buds in color and with very good proportions. Placement, attachment, and spacing seem to come consistently nice. Good propagator. An all around good one for both show work and commercial work. It is very hard to see where you would go wrong with A. B. Coutts. Healthy.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

BEAUTY'S BLUSH (Fischer 47) **85 days** **440**

Light pastel pink, almost white. Varies a little, depending on the season in its color depth. Six open on tall straight spikes, some ruffling to take away any plainness. Good parent for hybridizing work. Well liked by the florist.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

BEAUTY ELF (Wilson 56) **65 days** **350**

A cross of Glorious x Terrific. Light red with a light yellow blotch — Hellebore red on the color chart. Florets are listed as 350 size, but will probably end up as a 250 size. They are beautifully ruffled, wide open — no trace of hooding. A uniform grower, spikes are nice every time, and you do not need a lot of bulbs to get a show spike. Holds 12 to 14 open, with 7 in color out of 25 buds. 24" flowerhead — about a four foot spike that is strong and straight. A beauty in every way, attractive color — a strong contender for show honors and a good commercial prospect.

Price—L \$1.00—10/\$8.00; M 75c—10/\$6.00;

S 50c—10/\$4.00; B 10/50c

Growers Units—

3 L, 5 M, 5S—100 Bblts., \$10.00

10 L, 10 M, 10 S—500 Bblts., \$25.00

BOISE BELLE (Roberts 48) **98 days** **433**

One of our favorite glads—one we use a lot in hybridizing—its creamy yellow florets with a salmon pink edging or halo around each lip petal, extending right to the base of the lip petal. Ruffled just right. Will hold up to twelve open with eight to ten open quite common. Tall straight spikes 20 to 24 buds so that even with 10 or 12

open you have good balance. Its biggest fault is lateness, but by placing the bulbs in a warm place so that they have sprouts an inch or so long by planting time, you can gain several weeks on the blooming date. For the best show spikes, you should have the large or jumbo bulbs.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 4/20c—10/40c; B Pkge. 25c

BENJ. BRITTEN (K&M 49) **80 days** **366**

A very deep toned lavender, approaching purple on the chart. Has a white pencil mark on the lip petals. An unusual color to say the least. Tall spikes, that will hold six to eight open and still make a nicely balanced spike. Well liked for arrangement work.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

BETTY BRIGHT (Pazderski 53) **88 days** **401**

Lots of florescence from Betty Bright — Clean tall growing white with a cream throat and a touch of light rose in the throat. Holds six to eight open, but even with only a couple open you have a good useable spike. Usually runs about 20 buds on tall straight spikes. Seems to be able to take heat and drought better than most glads, and still produce saleable spikes. Attachment, placement, spacing and propagation are all very good. A good commercial.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

BOLD FACE (Evans 47) **85 days** **533**

With special care, Bold Face makes a spike that is hard to beat—a possible champion at the show. Deep reddish salmon with a large white throat on which is a large prominent black red brush mark. Six open on husky spikes, placement and attachment good. Wide open ruffled florets. Variable in growth seems to be its main fault. A show possibility any time.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 4/30c—10/60c; B Pkge. 25c

BLACK CHERRY (Rich 48) **85 days** **554**

One of the better black reds, very dark, shading into the black side of red. Florets are triangular in shape, six or more open on nicely balanced tall spikes. Capable of winning in the black red class very easily. Rather hard to propagate which keeps the price up somewhat.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/25c—10/80c; B 20/25c

BETTY DUNCAN (Benedict 49) **85 days** **422**

Betty Duncan was excellent again this year and was very well liked by the florists. Its clean clear orange, with an equally clean clear yellow throat just has something that appeals to everyone who sees Betty Duncan. Six open on tall straight spikes, with a somewhat wiry

spike, adequate to easily support the large flower head. Does not sunburn.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

BOLERO (Leffingwell 41)

85 days

490

Smoky orange with a dark red blotch—quite attractive—unusual formation of florets, ruffled, fluted and needle pointed with somewhat a triangular shape to the florets. Works up nicely in arrangement work where the color gives that needed touch. Four to six open on medium tall wiry spikes that are nicely balanced.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

BRENDA (Pazderski 55)

90 days

464

If you like Burma, you will like BRENDA too. BRENDA gives equal or better performance and has the added advantage of not burning in the sun. A dark red rose color, in itself quite attractive, with a darker red rose color in the throat, quite noticeable. On the reddish side of the color spoke — no trace of purple. The combination is very attractive. Not quite as much ruffling as Burma, but enough to make an interesting floret. Eight open — six in color — 18 to 20 buds is the usual performance, even in hot dry weather. Bulblets are plentiful, they germinate and grow easily. A very good show glad and a good commercial. Florists seem to like it better than Burma.

Price—L 30c—10/\$2.40; M 20c—10/\$1.60
S 2/20c—10/80c; B 25/35c

BROWN LULLABY (Pazderski 57) 95 days

390

If you missed out on Brown Lullaby last year, do not fail to get it this year. Comments from all over have been high in its praise, color-wise and on performance. An unusual color, light and dark at the same time, light golden brown is the general overall effect, but a deep tan interior to give it the dark effect. Highlighted with a red spot in the throat and with a silver edging to the petals. Unusual in color and unusual in growing ability. 18 to 20 buds, and it can easily hold up to 12 open — nicest when displayed with about eight open — (makes the nicest balanced spike at that point.) Placement, attachment and balance are above average. Very consistent in performance, each bulb producing a spike equal in all ways to any other from the same size bulb. The only fault we can find is a slight tendency to sunburn under extreme conditions. Hard to beat on the show table and one that is going to be a good commercial.

Price—L \$1.00—10/\$8.00; M 75c—10/\$6.00;
S 50c—10/\$4.00; B 10/50c—100/\$4.00
Growers Units—3 L—5 M—5 S 100 Bblts. \$10.00
10 L—10 M—10 S—500 bblts. \$25.00

BUY AMERICAN GROWN BULBS

BROWN ORCHID (Van Voorhis 40) 85 days**390**

For the past several years Brown Orchid has been growing over the 200 size, but for some strange reason, this year they were all 200 size. Velvety light brown and a touch of gold in the throat. Excellent for use with driftwood. Tall wiry spikes with five to six open—widely spaced florets—each floret set off by itself. Graceful and airy and excellent for arrangement work. A good grower, healthy and a fair to good propagator. We usually sell out on this variety early in the season.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

BURMA (Palmer 43)**85 days****564**

Burma has been quite variable in performance for several years. You get some extra good spikes and some that you cut off and leave in the field. Deep dark rose in color, shading lighter in the throat, heavy texture with lots of ruffling. Parent of many good glads — very interesting when it's good. This is one variety that shows color nearly all the way up the spike before the first buds open.

Price—L 2/25c—10/\$1.00; M 3/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

CAMPANILE (Fischer 56)**85 days****466**

Better than the average lavender, but we honestly think Vera will outperform it in every way. Somewhat darker in color than Vera, but on the bluish side of the chart. Petals are lightly ruffled, somewhat recurved, shading into an ivory colored throat. Holds six to eight open on tall straight spikes. Worthy of a trial.

Price—L 30c—10/\$2.40; M 20c—10/\$1.60;
S 3/30c—10/80c; B 20/25c

CARIBBEAN (Baerman-Fischer 57) 70 days**376**

See All America Gladiolus for description, etc.

CAMPUS MODEL (Wilson 57)**90 days****421**

Gorgeous Deb x Terrific — light salmon orange — a yellow blotch with a small orange colored fan. Color is very nice. Add nice ruffling and fluting, round wide open florets — no hooding, no crowding on the spikes, no gaps and you have a nicely balanced spike to show. 10 to 12 open 23 buds, a 26" flower head and a tall straight nearly five foot spike. All the makings of a grand champion. This may end up in the buff class, depends somewhat on where grown, but anywhere you grow it, you have something that is nice. Good propagator, plenty of easily grown bulblets. A good show prospect and a good commercial.

Price—L \$1.00—10/\$8.00; M 75c 10/\$6.00;
S 50c—10/\$4.00; B 10/60c

CARINYA (Errey 54)**85 days****432**

Not too good this year — but we are still going to list it in view of its past excellent performance. A blending of salmon pink into a cream throat, so smoothly done that one cannot tell where one color starts or stops. Clean large florets with eight to ten open, spikes that

are always tall and straight. Reminds one very much of Ethereal in general performance, but a much deeper color, and not quite a consistent performer.

Price—L 35c—10/\$2.80; M 25c—10/\$2.00;
S 2/25c—10/\$1.00; B 10/35c

CARMEN CORLISS (Roberts 53) 80 days 430

What a beautiful color combination, light salmon with a large light attractive yellow throat. Too bad it comes with such a short handle. One of the prettiest glads we grow, both the pink and yellow are in themselves attractive shades and the way they are combined is noteworthy. An excellent glad for home use where long stems are not a requisite. Holds six open and straight husky spikes.

Price—L 30c—10/\$2.40; M 20c—10/\$2.40;
S 3/30c—10/80c; B 20/25c

CATHERINE BEATH (Coutts 51) 88 days 312

Quite a deep tone of yellow without any throat markings. The color is rather on the deep side. Catherine Beath will hold eight to ten open on tall spikes. Once in a while you will get a crooked spike but most of them will come straight. Placement, propagation, growth and health are excellent. Recommended as a good yellow for show and commercial work.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

C. D. FORTNAM (Kadel 50) 90 days 440

The way C. D. Fortnam grew this past year made us change our opinion somewhat on it. We had rated it just average heretofore. Maybe this year it grew extra nice, but it is worthy of trying again. Blush pink in color, almost a self color, with nicely ruffled florets. The florists liked it very much, quite a useable color. Holds six to eight open on tall straight spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

CHAMOUNY (Baerman 38) 85 days 462

Almost irreconcilable — a terrible looking bulb but what beautiful flowers. Silvery edged cerise rose florets, eye catchers without a question — up to ten open on tall wiry spikes. Some years it seems to do extra nice and the next not so good. This year was one of its good years and we had some extra nice ones. Bulbs as we stated above, are tough looking, but they produce a spike you will like.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

CHARMAINE (New 40) 75 days 362

Our florist trade like Charmaine as it gives something a little different in color than they have been getting from the south during the winter and spring months. An excellent early commercial rose with six open on nicely balanced tall spikes. The color darkens in the

throat. A very useable variety for the early spring or for the late fall trade. Lots of fluorescence.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

CHARTREUSE (Rohrbach 50) 83 days 404

Reclassified to 404 — A useable yellow green color, on the greenish side by a considerable margin. Holds six to eight open on tall straight spikes, rather plain florets but with a crisp appearance. Exceedingly well liked by florists and arrangers, a very useful color. We find it rather slow to propagate but otherwise exceedingly nice.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 25/25c

CIRCE (K&M 49) 85 days 523

One of the nicest of the oranges — an exceptionally clean russet orange color with no flecking to mar its beauty. The creamy yellow throat with a feathering of red adds to its beauty. Your first impression though, is just a beautiful orange glad. Tall vigorous spikes with six to eight open. Florets are plain petaled, but make quite a display. A good show glad, a good commercial and we have found it to be a good parent for hybridizing. I am sure you will like Circe.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

COL. W. G. ATKINSON (Williams 50) 95 days 468

An attractive shade of lavender, somewhat on the dark side, but quite likeable—a shade that you are sure to notice. Makes tall straight heavy spikes, six to eight open. A good show glad and an excellent commercial. Its chief drawback is its lateness, but where you can grow late varieties, it is worthy of serious consideration.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25—10/40c; B Pkge. 25c

COPPER LUSTRE (Pazderski 53) 80 days 580

Well liked seems to be the answer for Copper Lustre. Everyone I talked to this year commented favorably on its copper red tan coloring. Made up in baskets, there is something that puts it in the unusual class. Actually a deep rose color with shades of copper at the edges of the petals with a throat of dark tan. A red marking on the lower petals adds just that needed touch of color. Ruffled and crisp, well attached, square shaped florets that can grow almost to six inch size. Makes lots of bubbles which, while medium in size, propagates easily and grows well. To utilize it at its best, use with about two florets open, for while it will hold up to eight open, it is inclined to be top heavy when it opens that many. One of the best glads we have for arrangement work, its color blends nicely with red, orange or yellow and especially nice with driftwood. Destined, I believe, to introduce a new line of color into the glad world.

Price—L 20c—10/\$1.50; M 2/20c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

CORONATION (Murray 56) **80 days** **440**

A good color combination of a clean medium shade of pink plus a beautiful cream throat. Six to eight open on an 18 to 20 bud spike. Enough ruffling to make an attractive floret. Spikes are medium tall and straight. Quite nice—worthy of a second look.

Price—L \$1.25—10/\$10.00; M 75c—10/\$6.00;
S 50c—10/\$4.00; B 10/\$1.00

CUPID (Fischer 49) **70 days** **300**

What a delightful early white — very clean with a waxy texture that gives it far more appeal than some of the larger whites. Our florist trade will take it for wedding work in preference to a lot of other whites. White Lace and Cupid work together to give a corsage that is outstanding. Holds five to six open on medium tall wiry stems. Propagates well and is healthy. Not much of a show glad but a good commercial.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

CROESUS (Hatch 52) **85 days** **412**

One of the better of the recent yellow introductions. Heavily ruffled florets of medium yellow. 18 to 22 buds on tall straight spikes, and better yet, it will hold 6 to 8 florets open with lots of color in the unopened buds. Good substance, attachment, placement, but only a fair propagator.

Price—L 2/35c—10/\$1.40; M 2/25c—10/\$1.00;
S 3/25c—10/80c

DUTCH MASTER (Salman 50) **90 days** **501**

If you like a blotched variety, you will undoubtedly like Dutch Master. Clean silvery creamy white with a soft carmine blotch, not too large but noticeable. A seedling of Salman's Glory, but with a much prettier color combination. Large florets, about six open on nice spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

DAVID WARR (Warr 53) **80 days** **436**

A flashy orange scarlet variety that does better than average. Quite early. Six to eight open on tall spikes, nice placement and attachment and good balance to the spike. Propagates nicely. Will sunburn, so cut before the first floret opens.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 20/25c

DEMURE (Platell 55) **85 days** **466**

A pleasing color combination of lavender and white. True lavender in color without any indication of rose or purple. Has a clean white rather large throat, and is very pleasing to the eye. Florets are ruffled in an attractive way, are well attached and placed. Six open on spikes of 18 to 22 buds, tall and straight spikes upwards to 48 to 54

inches tall. In hybridizing, it seems to transmit its lavender color and its ruffling to most of its offspring. Makes an attractive arrangement when used with white.

Price—L 75c—10/\$6.00; M 50c—10/\$4.00;
S 25c—10/\$2.00; B 10/35c

DIEPPE (Hassel 45)

85 days

436

It is possible to raise Dieppe to show quality spikes by good care — we had them this year and last year — lots of them. Dark salmon red in color, with a darker blotch in the throat. One of those colors about half way between scarlet and salmon. Six open on tall well proportioned spikes is the usual growth. Florets are lightly ruffled. Good show flower and a good commercial.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

DOLLY VARDEN (Harris 50)

95 days

533

Extra large florets of salmon with a white marking in the throat to relieve and beautify the floret, with the marking extending down the mid-ribs. Besides being large, the florets are well rounded and well attached. You can have six open with plenty of bud color and balance. The spike is strong enough to support the huge flower head and it is always straight. With extra care you can have show spikes. Makes a good commercial as the color is very useable.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

EDGEWOOD (Torrie Flad 51)

85 days

463

Some colors appeal on first sight — such is the medium dark rose shade of Edgewood. It is almost a self color with more than ordinary attraction. Growth is excellent, up to eight open in the field — tall strong spikes — excellent balance. A good show glad in the past and has the makings of a good commercial now that the price is getting reasonable.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 20/25c

EILEEN (Backler 52)

95 days

420

Probably due to a lack of wide distribution of Eileen, it is not too well known. A little late in blooming, but when it does bloom what a spike. This year in spite of five weeks drought, we had spike after spike around six feet tall, filled with light salmon orange colored florets. Six to eight open. Color is very useable for fall work and the type of spike it produces makes it a desirable commercial. Florets are lightly ruffled and have a light red feather marking. Propagates well.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

B U Y A M E R I C A N G R O W N B U L B S

ELIZABETH THE QUEEN (White 41) 85 days**566**

They say that Elizabeth the Queen is fading from the picture on account of short handles. We do not find it so, and from the larger bulbs we got fine beautiful spikes. Light mauve lavender with a red-dish feather in the throat. Six or more open on tall straight spikes from larger bulbs. Parent of many of today's beauties. A good commercial and a good show glad.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

ELMER'S ROSE (Fischer 51)**85 days****462**

Excellent performance is typical of Elmer's Rose. Color might be better, but you will still enjoy the beautifully ruffled rose tint of the florets and you certainly will appreciate the excellent performance. Eight open on tall straight spikes.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;

S 5/25—10/40c; B Pkge. 25c

ESQUIRE (Fitch 50)**85 days****536**

Probably not a grand champion but still worth growing. Bright scarlet with a dusting of gold in the throat. Florets are extra large, six to seven inches, and you can get six or more to open at one time. A good commercial as it does not fade or sunburn. Spikes are tall and husky, good attachment and placement, nice propagator.

Price—L 2/25c—10/\$1.00; M 2/15c—10/70c;

S 5/25c—10/40c; B Pkge 25c

ETHEREAL (Burns 52)**85 days****540**

We hate to say "I told you so" but with Ethereal we can — Grand Champion calibre in every spike. Soft light pink, gradually blending into a cream throat—no sharp transition of color. Large wide open florets — almost plain. But what a performance and what a show record. Eight to ten open (even in the field) is nothing unusual. For best results we suggest that you leave it open four before cutting. Attachment, spacing, and placement is invariably good. For show spikes, we suggest large or jumbo bulbs, de-eyed of course when planted. Ethereal for several years was not widely distributed but now that it is getting about the country, you will hear much of it.

Price—Jumbo 35c—10/\$2.80 (Limit 10); L 25c—10/\$2.00;

M 2/35c—10/\$1.40; S 2/25c—10/\$1.00; B 20/25c

EVANGELINE (Palmer 48)**92 days****540**

For several years Evangeline has had a reputation that it was diseased. If our stock is diseased, I only wish we had more of it. Pastel pink in color, on the light side, with a darker shading in the throat. Tall straight spikes that carry eight open florets with ease, and give at the same time, a well balanced spike. Excellent attachment, placement might be better, easy grower and a good propagator. For show purposes use large or jumbo bulbs — de-eye of course and keep well watered. A good show glad and a good commercial.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

FEMINA (K&M 56)**75 days****341**

Originally introduced as a miniature, but probably a little too big for that class. Deep salmon, shading lighter toward the throat with a bright light red blotch, slightly edged with yellow. White mid-ribs complete the color picture. Lightly ruffled. Opens up to eight on a medium tall straight spike. Quite nice.

Price—L 50c—10/\$4.00; M 35c—10/\$2.80;

S 25c—10/\$2.00; B 10/25c

FLAIR (Fairchild 51)**80 days****391**

Unusual in appearance—florets have widely flaring side petals of smooth light ivory, edged with rose orchid, and with the two lip petals a solid deep rose orchid, edged with ivory. Both the floret shape and the color are far different than the usual run of glads. Holds about five open on tall wiry spikes. Attachment, growth and propagation good, spacing somewhat wide apart.

Price—L 2/30c; 10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

FLASHLIGHT (Roberts 53)**70 days****337**

Remember "Beacon" with its brilliant scarlet orange color and its large yellow center. Then you can picture Flashlight in a smaller size. The yellow center takes up most of the lip petals but they in turn are edged with scarlet. Straight spikes, four or five open, 15 to 18 buds—could have a little more stretch—but otherwise nice. Slow propagator. One of those glads that you like.

Price—L 30c—10/\$2.40; M 20c—10/\$1.60;

S 2/25c—10/\$1.00

FLORENCE NIGHTINGALE**(Harris 47)****85 days****400**

A white that is used to measure other whites. To say that it is as good as Florence Nightingale implies that you think highly of the other white. Clean large white florets, lightly ruffled, set off with a cream throat. Holds, in ordinary field culture six open on tall strong spikes but will do better when pushed for show purposes. Will crook in extremely hot weather. Recommended for show and commercial work.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

FORT KNOX (Torrie 53)**80 days****412**

For us, Fort Knox is probably the best all around yellow that we grow. Consistently a tall grower especially from large bulbs, with a long flower head of twenty buds. The color is a clean medium shade of yellow, practically a self color. Plenty of ruffling to make it attractive, with a sheen that adds to its beauty. Fort Knox has performed well for us ever since we first got it. Much better than the average yellow —

a good commercial and a hard one to beat on the show table.

Price—L 20c—10/\$1.60; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 20/25c

FRANCESCA (Tobin 50)

90 days

566

A light shade of lavender, on the rose side of the color chart shading gradually to a cream throat, rather dark. Nicely ruffled, excellent placement and attachment. Tall to extra tall spikes, fully capable of supporting a long flowerhead. Six to eight open. With its excellent balance, it makes a good show glad — also a good commercial. Recommended.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

FRIENDSHIP (Fischer 49)

70 days

442

We can truthfully rate Friendship as one of the best we grow. Its clean light pink color, its clean white throat, combined in a beautiful way, plus tall straight spikes, five feet tall, with 20 to 25 buds, gives you a rare combination of beauty and growth. Lightly ruffled florets, six or more open, with lots of florescence. Friendship is very early, makes a good commercial for early sales. One of the few varieties that can be forced in the greenhouse with good results. You can hardly make a mistake on Friendship for whatever purpose you want it.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

GAYLORE (Harris 44)

80 days

432

A deep salmon pink with a clean clear cream throat. Six open on a medium to tall spike that is nicely balanced. A very useable flower for the floral trade, a nice one to have around the house.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

GWEN (Pickell 48)

80 days

560

Light rose with a darker throat. Grows tall and straight, with 6 to 8 open florets with just a trace of ruffling. Has a delightful fragrance—not too pronounced, but noticeable in a closed room. A good commercial and might be useful from a fragrant viewpoint in hybridizing.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

GARNET RUFFLES (Maynard 53)

85 days

352

For a 300 size glad, Garnet Ruffles leaves very little to be desired. Deep rich velvety red, an exceptionally nice color, with a light edging of silver on the edge of each petal. Enough ruffling to suit anyone—but not too much. Can easily hold eight open on tall well balanced spikes. An outstanding performer — a good propagator — healthy — a good show glad — an excellent color — what more can you ask?

Price—L 35c—10/\$2.80; M 25c—10/\$2.00;
S 2/25c—10/\$1.00; B 20/25c

GENE (Farrington 49) **80 days** **410**

A good commercial yellow — medium in color — tall straight spikes with six to eight open florets. Attachment, placement, propagation and color are good. Florists like its color and its handling ease. (Can win at the shows too.)

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

GOLD (Marshall 51) **80 days** **412**

A great big beautiful yellow — almost unbeatable from a color viewpoint. Tall spikes but only 12 to 15 buds. In spite of the apparently short flower head, you get a very useable spike as the florets give lots of florescence. The tall spikes make it very useful for floral work, the color is outstanding. Grows much like Orange Gold of which it is a seedling. For beauty of color, grow Gold—you will overlook its only fault, the short flowerhead. Recommended.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

GOLDEN BOY (Secrest 54) **85 days** **310**

Light canary yellow without too much variance in color. Tall spikes that easily hold eight open. Plenty of buds so that you invariably get a nicely balanced spike. Plenty of bulblets which germinate easily. Even the small bulbs will make commercially useable spikes — bulblets will often bloom. In spite of its 300 size, has the makings of a good commercial. Show glads are best from large bulbs.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
M 3/30c—10/80c; B 25/25c

HAWAIIAN DANCE (Wilson 56) **75 days** **352**

Glorious x Storm Terror. Not a show or a commercial variety — strictly an excellent novelty for the home or better yet, for arrangement work. Rich dark smoky brick red, with a large deep cream blotch. A flashy combination of colors. You can figure on seven open on a good head and about a four foot spike. If you like smoky varieties, try Hawaiian Dance.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;
S 20c—10/\$1.60; B 10/30c

HARRISBURGER (Mikle 53) **100 days** **552**

A beautiful shade of red — an “eye-catcher” for color — a clear deep cherry red without a doubt one of the finest reds on today's market. It has faults, but its color and beauty outweigh them. Late, a little misplacement and maybe a short handle once in awhile. Easily holds six to eight open, tall straight spikes with about 20 buds. To get early blooms, place your bulbs in a warm place until they get sprouts about two inches high. You can save several weeks time this way.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c; 10/50c; B Pkge. 25c

HOCUS POCUS (K&M 49)**62 days****313**

Hocus Pocus gets the honor of being the first spike to bloom, year after year. Deep golden yellow in color, quite a pleasing shade, but spoiled somewhat by the mahogany color large sized blotch in the throat. The color combination is not too pleasing. A good propagator, healthy, grows readily from bulblets. Very, very early and suggested in limited quantities for the early market.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c; 10/50c; B Pkge. 25c

HURRICANE (Evans 42)**75 days****424**

For us Hurricane seems to be one of the best in the orange class. Bitter sweet orange is the official color. Quite early — also good for a late crop. Medium to tall wiry stems, about six open, lightly ruffled. A small red feather on a cream throat adds a touch of contrast. The color is very attractive and well liked by the florists. A good propagator.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

HUNTRESS (Jack 45)**75 days****466**

We keep Huntress for an early lavender — for no other reason. Just a fair color, inclined to flea — medium shade of lavender. Useful for commercial work when other varieties are not available. Good propagator.

Price—L 2/25c—10/\$1.00; M 3/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

IVY ROBERTSON (Barrett 43)**88 days****440**

How the florists appreciated Ivy Robertson's long willowy graceful spikes, especially in August when most of the varieties were coming short. They also like the 7 to 10 florets that it holds open, and they liked the spacing — just far enough apart to keep balance and proportion in line. Light pink with a yellowish cream throat. Never seems to win at the shows, but the florist likes it very much. Seems to have the ability to transmit the long graceful spike to many of its seedlings.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c

S 5/25c—10/40c; B Pkge. 25c

KING DAVID (Carlson 51)**85 days****570**

Deep purple in color, flushed with a garnet cast on the lower petals. Nicely ruffled, triangular shaped florets. Easily holds six to eight open on tall well proportioned spikes. Has a good winning record at the shows — it really is stiff competition when well grown — well liked commercially. Good.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c; 10/50c; B Pkge. 25c

BUY AMERICAN GROWN BULBS

KING SIZE (Hartman 53)**95 days****541**

In contrast to last year's growing, King Size was extra nice this year. A salmon pink color a cream throat with a few carmine lines in the throat. Florets are plain, very large and are well attached, and only a few open will give lots of florescence. Can hold up to eight open on tall husky spikes. Some misplacement but not bad. A good show glad and a potential Grand Champ at any show.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;

S 3/30c—10/80c; B 20/25c

LADRONE (Palmer 47)**90 days****433**

We haven't listed Ladrone for several years, but it has been very nice for us during its absence. Light rose salmon, tending towards the scarlet end, with the tips of the petals a light yellow. A light yellow blotch adds to its interest. Somewhat like the old Beacon, but not as pronounced a contrast. Holds 6-8 open, a 20 bud spike, nice balance and a very nice color.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/25c—10/40c; B Pkge. 25c

LAVENDER AND GOLD (Baerman 43) 70 days**366**

While a little on the small size as far as florets go, these long tall spikes with four to six nicely spaced florets leaves little to be desired. A beautiful color combination, pastel lavender and its yellow throat adds that touch of color to make a splendid color combination. From an early planting we picked many dozen of beautiful spikes. The florists liked it particularly well as it was a much better color than either Huntress or Myrna Fay and for us, it bloomed just as early. Suggested for an early planting.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

LAVENDER LACE (Fischer 50)**85 days****466**

Not too much stock of this medium toned lavender. Lavender and cream—rather noticeable throat—an attractive combination. Texture is noticeably waxy. Six open on medium tall spikes, rather on the heavy side. Good propagator.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c

LEADING LADY (Johnson 42)**87 days****506**

We do not have a large stock of Leading Lady so do not order in large quantities. Still a leading contender on the show table when well grown. Cream on the white side, shading to deeper cream in the throat. Clean translucent in appearance. Typically holds 6 or more open on an 18 bud spike. Good for show and commercial.

Price—L 2/30c—10/\$1.20; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

BUY AMERICAN GROWN BULBS

LIEF ERICKSON (K&M 52)**85 days****506**

If you like cream colored glads, then by all means look at Lief Erickson. Capable of producing outstanding spikes if given a little extra care. Seven to nine ruffled florets of yellowish cream, tall, strong graceful spikes with good proportions. An easy propagator. We like the color of Leading Lady much better, but Lief Erickson will outperform Leading Lady, as far as number open is concerned. A good show glad and a good commercial.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

LORELEI (Howell 55)**92 days****506**

In our opinion Lorelei will be one of the outstanding glads for some years to come. It is our suggestion that you get a start. A clean pure clean cream color, carved out of a block of ivory, ruffled delightfully. The cream is on the white side and there is no trace of muddiness in it. Six to eight open on tall straight spikes. Grows well, makes lots of bulblets which germinate nicely.

Price—L 40c—10/\$3.20; M 25c—10/\$2.00;
S 2/30c—10/\$1.20; B 15/25c

LUCKY ME (Wilson 55)**85 days****331**

One of those glads that seems to produce a fine spike from practically every bulb you plant. Salmon with a light yellow blotch and a small rose feather. Ruffled to perfection — ten open florets on straight strong spikes — wide open style, each one in its proper place on the spike, and even with ten open you can have a nicely balanced spike. Its clean color makes it easy to recommend it.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;
S 20c—10/\$1.60; B 10/30c

MACUSHLA (Paul 50)**85 days****460**

The ladies seem to like Macushla very much and so do the florists. Light rose, shading toward the lavender side, with little variance in the color throughout the floret. Six to seven open on tall slender wiry spikes. Placement, attachment and balance very good.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

MAJESTIC (Rowse 49)**95 days****532**

We would be inclined to rate Majestic as scarlet rather than deep salmon. Straight tall spikes, always, with up to eight huge florets open at one time. Florets are plain, somewhat round in shape and are above average in size. Seems to do well in all kinds of weather, even in hot dry weather.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

BUY AMERICAN GROWN BULBS

MANCHU (Palmer 45)**80 days****513**

On the spectacular side with its wide flaring blooms of brilliant deep yellow overlaid with a flush of pink and a small reddish blotch in the throat. Somehow, it just seems to have an oriental feeling. The spikes are on the slender side, but are plenty strong enough to hold the six to eight florets it usually produces. Grows mostly tall stretchy spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Bkge. 25c

MAYTIME (Baerman Fischer 57) 70 days**442**

See All America Gladiolus for description, price, etc.

MEG (Pruitt 49)**85 days****412**

A nice clean clear yellow with ruffled florets. Six open and tall well proportioned spikes. A rather unusual formation of the floret adds interest and beauty to the floret. Not too well known but quite nice. A good commercial, well liked on the market because of its nice color. Try a few to see for yourself.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

MESA MIST (Hartman 52)**85 days****486**

We grew unbelievably nice spikes of Mesa Mist this year. Six open on tall husky straight spikes that would make anyone proud to say "I grew those". Mesa Mist is a smooth grey sport of Pastel, not too much variance in the color. It handles and grows like Pastel. (We do not have too big a stock, especially in the smaller sizes.)

Price—L 2/30c—10/\$1.20; M 3/25c—10/70c;

S 4/25c—10/50c; B Pkge. 25c

MID AMERICA (Knierim 47)**85 days****550**

A clean brilliant light red. Huge florets on long flower heads. Quite a show flower. Seems to do better in the cooler weather and we had some excellent spikes in September. Up to eight open, tall, well balanced spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

MIGHTY MONARCH (Butt 46)**88 days****552**

A tall growing medium shade of red—can make some world-beater spikes when pushed a little extra. The florets are on the plain side, except for a velvety touch or sheen. The color is very good, useable wherever you can use red. Holds six to eight open with tall straight spikes and a well balanced flower head.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;

S 5/25c—10/40c; B Pkge. 25c

MODERN STYLE (Wilson 54)	75 days	330
---------------------------------	----------------	------------

Pastel salmon, but not too light to be likeable, with a large cream blotch and a small orange fan in the throat. Lightly ruffled and fluted florets, ten or more open on a 22 bud spike. Will open more than ten but you begin to lose balance when you get too many open. Has a 28" flower head, so it can stand lots open. Spikes are tall and strong —good attachment and placement.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;
S 20c—10/\$1.60; B 10/30c

MORNING KISS (Hulsebosch 48)	85 days	500
-------------------------------------	----------------	------------

Pure white with a faint violet strip in the throat. Florets are large, well attached to tall straight spikes. Holds about six open.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

MOTHER FISCHER (Fischer 51)	85 days	400
------------------------------------	----------------	------------

I do not think I really appreciated Mother Fischer's possibilities until this summer. It is surely a pleasure to pick spike after spike right down the row, each one shoulder high, tall and straight. Heavily ruffled florets of white, with a waxy texture that actually makes it worth more to the florist than some of the other whites. Six open easily, more if you push it. Recommended for both show and commercial work. Makes lots of large bulbs.

Price—L 2/30c—10/\$1.20; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

MY-O (Wilson 1956)	90 days	467
---------------------------	----------------	------------

Gorgeous Deb x Terrific. Well liked by the fancier and the florist for its pastel lavender color, offset with a big yellow, clear and clean, blotch. Florets are wide open, even with the ruffling. You will find 8 or 9 open well attached florets on tall straight spikes. 22 Buds, 27" flower head and a 5' spike. A good performer.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;
S 20c—10/\$1.60; B 10/30c

MYRNA FAY (Lines 46)	75 days	466
-----------------------------	----------------	------------

Another of the early lavenders with a lot to be desired color-wise. Medium lavender in color, about like Huntress. Holds six open on medium tall spikes that are husky and straight. Propagates well. Chiefly used for early commercial work.

Price—L 2/25c—10/\$1.00; M 3/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

NEGUS (K&M 51)	85 days	354
---------------------------	----------------	------------

A consistent grower of good spikes, providing you do not push it too much. Deep black red, with a velvet touch to the petals. Does not fade or sunburn — unusual in the black reds. Easily holds ten open on tall well balanced spikes. A good variety for the show table where

it is hard to beat. Just plant — do not fertilize, but see that it has enough water.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

NOWETA ROSE (Fischer 50) 85 days 568

If you want a display of color, a clean lavender rose, try Noweta Rose. Easily holds eight open and lots of buds in color too. Tall, well balanced spikes filled with ruffled florets. For performance, it is hard to beat on the show table, but it can be beaten from a color viewpoint. Well liked by the florists.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

OCTOBER SUNSHINE (Quackenbush 47) 85 days 420

Light orange, shading to yellow in the throat—looks yellow from the distance. An attractive color combination—one that is very well liked, particularly for fall work. Six or more open on tall husky spikes. Has a tendency to misplace the lower floret on some spikes.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

OKLAHOMA (Wilson 45) 90 days 386

We do not carry a big stock of Oklahoma, so order this soft grey-pinkish lilac throat — smokie early. A pleasing combination of colors, useable in almost any color combination. Ruffled florets, well placed and with good attachment.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; No bblts.

ON PARADE (Wilson 54) 70 days 423

Larime x Victory Queen. A very clean and brilliant combination of rich golden orange and a deep cream blotch. Heavily ruffled and fluted florets, wide open and of very heavy substance. Attachment and placement on the tall straight spikes is exceptional. 8-9 open, 20 buds, 26" flowerhead, and a five foot spike. Quite early and should be useful for the early market.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;
S 20c—10/\$1.60; B 10/30c

ORANGE GOLD (Marshall 45) 80 days 422

Tall spikes with a short flower head. A beautiful shade of orange with a yellow throat. The color alone makes it worth while growing. Best when planted early and given lots of water. Florists like it very much and find it quite useful in spite of its short head.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

ORANGE MAGIC (Wilson 56)**85 days****322**

Another from the same cross of Glorious x Terrific. A fairly deep orange color, with a light cream blotch and a delicate orange rose marking in the throat. Again, we find nice ruffling, wide open flat florets that give a lot of florescence. Holds about 9 open out of 22 buds, a 26" flowerhead and about a four foot straight spike. A florist delight as it opens to the tip, and a good show glad.

Price—L \$1.00—10/\$8.00; M 75c—10/\$6.00;

S 40c—10/\$3.20; B 10/60c

ORANGE PETUNIA (Wilson 52)**90 days****321**

Light orange, a lighter orange blotch — reminding one very much of the blotch in the throat of a petunia. A clean color, no flecking. Holds, like most of Mr. Wilson's varieties 8 or 9 open on tall straight spikes. Will average 18 to 20 buds a 26" flower head and a 5' spike. Healthy and a good propagator.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;

S 20c—10/\$1.60; B 10/30c

OSTRICH FEATHERS (Pfizer 50)**85 days****540**

We do not grow a large stock of Ostrich Feathers, but we do keep it for the odd shape of its florets. These are deeply lacinated, triangular in form, nicely ruffled and somewhat pointed. Light peach in color—nothing unusual that way—but still attractive. Five to six open on medium to tall straight spikes. Seems to carry its lacination to a large number of its seedlings. Makes attractive healthy bulbs.

Price—L 2/30c—10/\$1.20; M 3/25c—10/70c;

S 5/30c—10/50c; B 25/25c

PACTOLUS (K&M 47)**80 days****417**

Individually, Pactolus is not beautiful, but put a dozen or so in a vase or basket and you have something to "write home about". Buff yellow color, passing for yellow with all but the color fadist, with a large startling red blotch, a pleasing color combination. Six open or more, on tall straight spikes. Florets are lightly ruffled. Good propagator and healthy. Well liked by the florists.

Price—L 2/25c—10/\$1.00; M 3/30c—10/80c;

S 5/25c—10/40c; B Pkge. 25c

PALOMAR (Beaton 54)**80 days****442**

It's just too bad that some of the nice glads do not get off to a good start — Palomar for instance. Excellent performance, consistent growth with few faults. A medium deep shade of pink, with a large creamy yellow throat, a good color combination, attractive to the n'th degree. Good facing, attachment and placement with spikes uniformly well balanced and straight. Six to eight open florets complete a pretty picture. We would suggest you try Palomar.

Price—L 35c—10/\$2.80; M 25c—10/\$2.00;

S 2/25c—10/\$1.00; B 20/25c

PATROL (Palmer 46)**77 days****416**

Patrol, as grown in the show patch, is far better than when grown under field culture, but even in the field, it is easy to find spikes with eight or more open. The color is an apricot buff with a yellow throat, giving the effect of yellow to the floret. Spikes are tall, well balanced and nicely proportioned. Healthy and an easy propagator. A good show glad and a good commercial. Seldom makes jumbo bulbs but a large bulb, given a little extra care will make your eyes open.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c; 10/40c; B Pkge. 25c

PAULINE (Wright 52)**90 days****400**

A good show quality glad—six to eight open, six to eight in color and plenty more buds to give a well proportioned nicely balanced spike. Add a tall husky spike—a clean white color with no markings, but some ruffling to relieve the plainness—what more can one ask for Pauline has all the earmarks of a good one, both for show and commercially. We would suggest you try Pauline.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PENNANT (Palmer 52)**92 days****440**

A light soft pink, with no markings or flecking. One of those cool colors that you like the first time you see it, and especially attractive under artificial light. Strong stiff spikes, five inch florets and up to ten of them open at one time. Florets might be spaced further apart—its only fault.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PERSIAN RUG (Roberts 50)**85 days****486**

Plum mulberry in color with a touch of smoky rose on the edges of the petals and a large cream center. Doesn't hold too many open, six at the most, but a few of them in a vase makes you appreciate the real beauty of Persian Rug. Healthy and a medium good propagator.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PICARDY (Palmer 31)**90 days****530**

Almost too well known to need describing. Light salmon colored florets, large in size and of a nice shade of salmon. Holds about six open on tall straight spikes of about 18 buds. Parent of many of today's best glads. It's hard to obtain healthy stock of Picardy, but we think ours will prove to be exceptionally healthy.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

BUY AMERICAN GROWN BULBS

PINK DIAMOND (Fischer 54) 70 days 460

Pink or light rose — we are inclined to call it pink — six to eight open on tall well balanced spikes. The floret is somewhat ruffled, with a sheen that makes it very attractive. Rather on the early side, which should make it useful for early commercial work. Worthy of serious consideration.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PIRATE CACHE (Wilson 53) 90 days 482

Larime x Victory Queen. It's hard to see where the color comes from out of this cross. A beautiful shade of bronze (chocolate) with a big clear yellow blotch. A smoky, but well worth growing even if you do not like smoky colors too well. 7 open on a 20 bud spike, 4½' spikes, nice stretchy heads. Good substance, performance and propagation. A good smoky.

Price—L 40c—10/\$3.20; M 30c—10/\$2.40;
S 2/25c—10/\$1.00; B 25/35c

PRINCESS (Larus 53) 90 days 466

A very good lavender, probably a little better than average. Eight or more florets on tall straight spikes. Resembles Heirloom in color very much, but it outperforms Heirloom easily.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PROF. GOUDRIAAN (K&M 50) 80 days 500

Outside of making extra nice spikes, we are not too impressed with Prof. Goudriaan. Cream in color, but not an attractive shade of cream. The throat is deep cream in color with a light violet blush in the throat. Attachment, placement and growth are good. Holds lots open and can be a show winner with a little extra care.

Price—L 2/25c—10/\$1.00; M 4/30c—10/60c;
S 5/25c—10/40c; B Pkge. 25c

PROSPECTOR (Leffingwell 53) 85 days 410

Rated a light yellow, with a light orange blotch showing up prominently on the lower florets. Could almost be classed 412 in our garden. Fluted ruffled florets, six to eight open on tall nicely balanced spikes. An unusually nice color combination, well liked by the florists. Quite useable for fall arrangements.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PRUNELLA (Stringer 51) 90 days 580

Here is one for the smoky fan — a huge plum red smokie that really produces large spikes. Florets are in themselves large, and when you get six or more open on a tall husky spike, you have quite a display of color. The attractiveness is assisted by a noticeable cream

ALL AMERICA GLADIOLUS

We now have five varieties that rate the All America label. We have grown all but the 1958 introduction, and the comments listed under them are our own. The 1958 introduction is taken from the description furnished by the All America Gladiolus association.

1958 • *Emperor*

EMPEROR (*Fischer Baerman*)

The newest member of the ALL AMERICA GLADS and as they describe it — regal purple trimmed in white — a rich and distinctive color. Five foot spikes, 7 to 8 open round recurved florets — sounds interesting and worthy of more than a casual look.

1957 • *Caribbean*

CARIBBEAN (*Baerman Fischer* 57)

70 days

376

A nice blue-violet floret, a deep rich violet throat and small cream spear create a nice arrangement glad. Sort of a delicate blue color is the overall effect. Holds six to ten open on a medium tall straight spike of nice proportions. It might be criticized for the color of the partially opened buds, but otherwise quite nice. A good one for arrangement work where its color is extremely useful.

1956 • *Royal Stewart*

ROYAL STEWART (*Pomment* 56)

75 days

450

Long tall spikes holding eight or more clear light red florets on a well balanced spike. Color itself is quite nice, but is somewhat reduced in value by the throat marking which could be more attractive. For performance, consistently, you will like Royal Stewart.

1957 • *Maytime*

MAYTIME (*Baerman Fischer* 57)

70 days

442

Eight to ten open florets of deep pure pink, offset with an attractive white throat. Tall somewhat wiry spikes. An attractive color and an easy grower. If we had to choose between all of the All America Glads, Maytime would be given very serious consideration.

1956 • *Apple Blossom*

APPLE BLOSSOM (*Baerman Fischer* 56)

70 days

460

A corona of cool rose pink, snow white florets, a nice combination of colors. Made up alone, they seem to lose a lot of their beauty, but with a focal point of darker pink, one can really appreciate the full beauty of Apple Blossom. A vigorous grower, medium heavy in substance, with some ruffling. Holds six or more open on a medium to tall spike. We would still list it as a 360 for average growing.

PRICE—Large bulbs only—No. 1 size as far as possible

50c each—12 for \$5.00 (6 for \$2.50)

One each of the five varieties \$2.25

Each variety is patented and the right to reproduce All America varieties for resale or to sell cut flowers is restricted.

blotch in the throat. Would make up an attractive basket just by itself.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 25/25c

POINSETTIA (Johnson 52) 87 days 450

An attractive shade of pure red, on the light side, with six or more lightly ruffled florets open on tall straight well balanced spikes. Opens exceptionally well for a red when cut tight — a good commercial trait. Good grower, healthy — bubbles are somewhat hard to germinate but make up for lost time after they are through the ground.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

RADIANCE (Butt 42) 80 days 350

Light red with a darker throat marking that is hardly noticeable. Stock is scarce and we do not have too many. Has a very good show record. Holds 6 to 8 open — tall straight spikes — good color.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

RAVEL (K&M 47) 77 days 477

I never thought Ravel could be grown like we grew it this year. Seven or more open well placed florets, with a flower head of 24 to 30 inches. 18 to 22 buds, and a nicely balanced spike. On the odd shade of blue, with a red blotch in the throat somewhat ruffled. We planted our Ravel early and had plenty of rain and that may be the answer for our exceptional growth. Sorry—only large or jumbo bulbs this year and not too many of them.

Price—L 2/30c—10/\$1.20; Jumbo 2/35c—10/\$1.40

RED CHARM (Butt 39) 85 days 452

Old faithful would be another good name for Red Charm. Consistently performs well under all kinds of conditions. Medium red in color, shading darker in the throat. Six to eight open on tall strong spikes. Florets are large and well placed — makes quite a display, particularly when back lighted. One of the standby commercials and a consistent show winner. Its only fault is that the bulbs are inclined to sprout in storage, making it a little hard to handle.

Price—L 2/25c—10/\$1.00; M 4/30c—10/60c;
S 5/25c—10/40c; B Pkge. 25c

RED CHERRY (Roberts 46) 75 days 436

Our Red Cherry bulbs were planted early; they got lots of water in the early season; we had some wonderful spikes from them. A light cherry red, with a little deeper color in the throat, six to eight open on tall well proportioned spikes. Very early and very nice for such an early red. About two weeks earlier than Red Charm. By planting them both at the same time, you will have a succession of nice reds. Quite a nice show glad and a very good commercial.

Price—L 2/25c—10/\$1.00; M 2/15c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

RED RADIANCE (Melk 53) **85 days** **450**

This one seems to be destined for a good commercial as well as a good show glad. Glowing light red in color, more than usually attractive. Six to eight open, spikes that are tall and strong. Propagates nicely, grows well. Good.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

RED WING (Wright 48) **85 days** **436**

Another of the likeable scarlet reds. More on the red than the scarlet side, with a glow to the floret. Shaded darker on the lip petals, lightly ruffled recurved florets. Good performance, up to eight open on tall straight spikes. A good show flower and a good commercial.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

REGINA (Palmer 53) **80 days** **520**

Listed as light orange — amber to our mind. A small scarlet blotch with the amber orange color makes it attractive colorwise. One of the huskiest growers in our garden, six foot spikes are not uncommon, add six or more open and you are in the running for section champion any time. Florets are of very heavy texture — some misplacement on a few spikes, but on the whole a little better than the average.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

RHETT BUTLER (Kuhn 47) **75 days** **336**

An early scarlet that is tops. A brilliant shade of scarlet with a bit of an orange tinge to it, but an exceptionally clean color. Plain somewhat rounded florets, six open on slender but strong, medium tall spikes. One of the earliest to bloom with an extra nice color for so early a bloomer. Florets seem much bigger than they actually are which makes it doubly useful.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

ROSE CHARM (Fischer 48) **65 days** **360**

Another 300 size glad that is very early and quite useful. A light attractive shade of rose with a noticeably prominent cream throat. A very nice color combination and well liked. Five to six florets open on tall straight spikes. Attachment, placement, color, propagation—excellent. Quite early and well liked commercially.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

BUY AMERICAN GROWN BULBS

ROSE GALLANT (Wilson 57) 90 days 463

Glorious x Terrific. Medium rose in color, very clean and even colored, with a cream blotch and a small light orange fan in the throat. Lightly ruffled and fluted florets, recurved slightly, with 10 open on a 25 bud 30" flower head. Slender, straight but stiff spikes about 5' tall. To us, it looks very good for a commercial flower, and it is going to be hard to beat on the show table too. Well worthy of a trial.

Price—L 75c—10/\$6.00; M 50c—10/\$4.00;
S 30c—10/\$2.40; B 10/40c

ROSE JOY (Wilson 56) 90 days 460

Colored lavender rose, almost mauve (rosalane purple on the color chart) with a cream blotch and a small blotch of the lavender rose color in the throat. We liked it very much as did all our visitors. 8-9 wide open florets on a 25 bud 26" flowerhead. Spikes are tall, straight and well proportioned. Some ruffling in the florets, strong attachment. Makes lots of bulblets which germinate and reproduce nicely.

Price—L 75c—10/\$6.00; M 50c—10/\$4.00;
S 25c—10/\$2.00; B 10/50c

ROSITA (Woods 52) 85 days 563

Personally, we do not care too much for the color of Rosita, but for performance it is very hard to beat. Light rose colored florets, each petal outlined with a white edging, and a small dark rose blotch in the throat. Wide open florets, fluted and frilled, eight to ten open on tall straight spikes. Attachment is very good, but placement is a little close. Opens well when cut tight. A show winner.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 3/25c—10/50c; B 25/25c

ROYAL SCOTT (Taylor 52) 80 days 470

We had some very nice spikes of Royal Scott this year. The color is purple, but on the blue side of the chart rather than the red. Six florets are usually open on spikes that are tall and straight. A good all around performer and quite useable if your market will take purple. A good show glad.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25c; 10/40c; B Pkge. 25c

ROYAL STEWART (Pommert 56) 75 days 450

For description, prices, etc. see All America Glads.

RUTH LORENE (Fuller 52) 80 days 412

A sport of Spotlight, but much different in appearance. Medium, almost a deep yellow in color, with no other markings throughout the floret. Exceedingly heavy in texture, a velvety sheen and exquisite ruffling or rolling of the petals. Grows much like Spotlight, holds five to six open on tall straight spikes. Healthy.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 10/40c; B Pkge. 25c

SALMAN'S GLORY (Salman 47) 80 days 507

Can be grown to immense size if you push it hard. Tall husky spikes, capable of holding six inch wide open plain florets. Attachment is good as is the propagation. Florets are cream colored shading to a yellow throat with an attractive carmine colored blotch. A good commercial — a fair show glad unless pushed.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

SANS SOUCI (K&M 51) 85 days 436

One of the nicest to come out of Holland in a long time. A very clean glistening scarlet with a white line on the lip petals. Can hold up to eight open on nicely balanced medium to tall spikes of 18 to 20 buds. Good propagator. Inclined to be somewhat erratic in growth, but you will get lots of extra nice spikes too.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

SALUTE (Fischer 51) 90 days 426

Dress Parade Scarlet, with a sharply defined white mark in the throat. Holds 6 to 8 open on tall straight spikes. A very nice color combination, attractive and well liked. Propagates nicely, healthy, makes a good record for itself.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

SMILING QUEEN (Pazderski 53) 80 days 406

Some creams in our opinion are not attractive due to a muddiness in the color, but Smiling Queen is clean — it gives one an impression of being white. Well grown, you can take a spike of Smiling Queen to any show and feel sure that you are going to be in the running with the best of them. A rich clean cream, shading to a deeper cream in the throat and on the lower petals — no trace of muddiness. The large sized florets are wide open, lightly frilled, well attached and placed on the tall straight spikes. Holds six to eight open. Bulblets are medium in size but propagates easily, making mostly medium and large sized bulbs. Performs well under hot dry conditions — better of course under ideal conditions. Opens well when cut tight. A good show glad, a good commercial. Try it.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

SIERRA SNOW (Harris 1951) 80 days 400

We had some excellent spikes of Sierra Snow this year. Six to eight open right down the row—nicely ruffled florets of a clean white shade, shading to a cream throat with a light toned purple line in the throat. The florists liked it. Spikes are on the tall side, straight with excellent proportions, placement, etc.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

SILVER WINGS (Ritsema 44) 88 days 500

We have always liked the clear beauty of Silver Wings, its pure white waxy texture appealing to us very much. Sport of Picardy with typical Picardy performance. Our stock is not large, but we list it for your convenience.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 10/40c; B Pkge. 25c

SNOW DRIFT (Fischer 54) 75 days 500

A white that you will like the first time you see its clean white ruffled florets and when you see its performance, you know you will like it. Holds eight open on tall spikes of up to 24 buds. Placement is formal but consistently nice. Opens well from tight buds. We like its waxy texture very much, but we like it for its all around goodness too.

Price—L 2/35c—10/\$1.40; M 2/25c—10/\$1.00;
S 3/25c—10/80c; B 15/25c

SNOW PRINCESS (Pfizer 39) 80 days 400

To stay in the picture for 18 years indicates more than ordinary performance. Clean pure white in color, five to seven open on tall strong spikes. Good attachment and placement. A well known commercial white, the florists like it. Can make a fair show spike when given extra care. Hard to beat for all around performance.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

SOUTHERN BELLE (Fischer 52) 75 days 483

Pink, with a contrasting snowy white throat, with a trace of smoke in the color, putting it into the smoky division. Tall husky spikes, one right after the other, six open and nice balance. Healthy and a good propagator.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

SOUTH SEAS (Wilson 47) 100 days 491

We never have enough of South Seas—it seems to be in considerable demand. A dark gray smokie, flecking lighter at times, with an attractive colored scarlet throat marking. Tall husky spikes, six open. A good show glad, an easy propagator.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 10/40c; B Pkge. 25c

SPIC AND SPAN (Carlson 46) 80 days 444

A show winner — but to make a good show spike, you will need large bulbs — de-eyed of course and given some extra care in the field. Deep salmon pink in color, useable and well liked by the florists. Can hold eight or more open — tall straight spikes with placement, at-

tachment, and balance good. For all around goodness, leaves little to be desired. Recommended for show work and as an excellent commercial.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

SPOTLIGHT (Palmer 44)

80 days

413

Our strain of Spotlight bulbs have produced the nicest healthiest bulbs that I have ever seen of this variety. Clean and clear medium yellow with an attractive — very pleasing — scarlet colored blotch in the throat. The color combination is very good. Holds six florets open on tall well proportioned spikes. If you are looking for healthy Spotlight bulbs, try ours.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

Sprite (Palmer 52)

88 days

320

Looking for a good flashy glad for foundation planting or a spot of color in your garden.. Try Sprite with its bright yellow — its orange cast blending together in a way almost impossible to describe. Heavily ruffled florets and somewhat short but husky spikes. That is what makes it so useful for spot planting. A beauty if there ever was one—you will like it.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

STERLING (Harris 50)

85 days

469

Tall and ruffled, phlox purple with a rose feather in the throat. The general aspect is purple — the florist calls it purple. Nice spikes, about six open good attachment good health—a good propagator.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

SUMMIT (Pazderski 54)

85 days

552

Not a light red not a dark red, about half way in between, with a darker red marking on the lower petals and in the throat. Brighter than Red Charm, reflecting the light instead of absorbing it. Tall straight spikes averaging 18 to 20 buds. Consistent grower of uniform spikes. Holds up to eight open. A good show glad—worthy of trial and an excellent commercial. Will be a stiff competitor for Red Charm in the next few years.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 25/25c

SUNSPOT (Roberts 45)

80 days

417

We have a small stock of Sunspot in case you want a few of this attractive buff. It has been missing from many catalogues although at one time it was a big show winner. Well grown, you have a spike that gives them all a run for the money. Tall well balanced spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

SWEET SIXTEEN (Fischer 51) **80 days** **442**

A very useable medium pink, more a commercial than a show glad. Medium pink in color, not too much variance throughout the floret except for a lighter throat, with five to six open on good strong medium tall spikes. Propagates well and is well liked by the florists.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

TAJ MAHAL (Cave 52) **90 days** **400**

As the Taj Mahal is a thing of beauty, so is the Taj Mahal of Mr. Cave's. To our way of thinking, it leaves very little to be desired. Its beautiful creamy white color alone is worth talking about — then add heavy ruffling and needlepointing to the floret — you really have something that is worth talking about. Spikes are tall, up to six feet, straight, and they will hold six or more florets open at one time. Performance well above average, clean cut — ability to open nicely when cut tight — everything about Taj Mahal has made us like it much more than the average glad. A very good show glad and better than average for commercial.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

TAN-GLO (Arenius 54) **90 days** **480**

Tan-Glo was stiff competition at several shows this year and deservedly so. Tall straight spikes, eight or more open easily, with a color that is quite attractive. Light tan, shading to a light rose tint in the throat. We did not have enough to take to the florists, but the color looks as though they could use it. In the meantime—it's better than good for show purposes.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 25/25c

TERRIFIC (Wilson 50) **70 days** **310**

An early yellow, deep canary in color, with an outstanding performance record. Ten open is not unusual, and even with ten open you still have a nicely balanced spike. Tall straight spikes, with good placement and good attachment. Makes plenty of bulblets which propagate nicely. Very useable as an early yellow in spite of being classed as a 310 size. Given good care, it makes a large 310 or a small 410 size.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c; 10/40c; B Pkge. 25c

TITAN (Palmer 39) **85 days** **532**

Classed as salmon, but the florists call it Shrimp Pink. Holds 6 to 8 florets on tall strong spikes with good placement, facing, balance and attachment. Has produced some nice seedlings for us too. Good commercially.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

TUNIA'S CHALLENGE (Both 50) 90 days 510

Herb Evans claims this will make a 7" floret, but we can't do that. A clean bright yellow, exceptionally tall spikes with large florets — about 6 to 8 open. On the whole quite nice and worthy of a trial.

Price—L 25c—10/\$2.00; M 2/35c—10/\$1.40;
S 2/25c—10/\$1.00

THE RAJAH (Jack 1951) 85 days 570

Purples as a rule do not move well on the Cleveland market, but we were able to move every spike of The Rajah without any trouble this year. A true purple color, without much variance throughout the floret, six to eight open round ruffled florets, on tall straight spikes. King David is probably prettier, but The Rajah will give it a run for the money.

Price—L 2/30c—10/\$1.20; M 3/25c—10/70c;
S 5/25c; 10/40c; B Pkge. 25c

VAGABOND PRINCE (Palmer 34) 80 days 391

We do not have too big a stock of Vagabond Prince, but we are listing it so that you may get a few if you desire. A mahogany brown colored floret with a delightful flame colored blotch in the throat. Will hold about six open on straight medium tall spikes and with a little extra care, can easily be grown to show possibilities. Well liked commercially.

Price—L 2/30c—10/\$1.20; M 4/30c—10/60c;
S 5/25c; B Pkge. 25c

VANISLE (G.R. White 52) 85 days 590

Exotic is probably the best way to describe Vanisle. A very unusual smokie — mulberry color with attractive white markings. The florets are very large, and though it will only open three or four at a time, they are so big you get lots of florescence. Spikes are short and the flowerhead is short. The overall effect is attractive. Order large bulbs for best results—you will be disappointed from the results of the other sizes unless you are buying to grow for the next season. Recommended for the flower arranger particularly.

Price—L 60c—10/\$4.80; M 40c—10/\$3.20;
S 25c—10/\$2.00; B 15/25c

VENUS (Salman 55) 80 days 367

A pale shade of blue—maybe lavender with a blue cast with a dark violet blue blotch. Can easily hold six or more open on spikes that are well balanced, tall and straight. We are inclined to class it as a four hundred size rather than a three hundred. A novelty, but nice.

Price—L 50c—10/\$4.00; M 35c—10/\$2.80;
S 25c—10/\$2.00; B 15/25c

B U Y A M E R I C A N G R O W N B U L B S

VERA (Pazderski 53)**95 days****466**

Maybe we boasted a little for the past several years about Vera, but results at the shows indicate that we were not too far off in our judgment. Look at this year's records of winners and see. Light lavender in color, on the blue side of the chart, shading to a light almost white throat. The lower petals are slightly lighter than the rest of the floret. Ruffled nicely—very pleasing. Eight open is ordinary, ten possible with a little extra care. The spike is tall and straight, well able to carry its 20 to 22 buds. Attachment, placement, health, propagation, ability to open when cut tight all add up to a wonderful glad. The florists like it very much—they ask for more. Stands heat well. Recommended.

Price—L 30c—10/\$2.40; M 20c—10/\$1.60;
S 2/20c—10/80c; B 25/35c

VIOLET CHARM (Jack 53)**85 days****476**

A soft shadowy violet with a blue throat, with the blue almost the predominant color. Maker of exceptional spikes, eight or more open, tall, husky spikes with excellent balance. Recommended for the man who wants something just a little better than the rest.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

VIOLET DICKINSON (Barrett 46)**85 days****501**

Crispy lightly ruffled white florets on somewhat of a wiry tall stem, six or more open. The white shades to cream in the throat and there is a lavender feather in the throat. We have had some extra nice seedlings from crosses on this, finding that it carries many of its characteristics into its offspring. Good attachment, heavy texture and nice spacing. Good propagator. Florists like Violet Dickinson very much.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

VISION (Roberts 53)**95 days****330**

Edges of pale coral pink, maybe light salmon, with a prominent center of clear light yellow. Nicely ruffled, somewhat fluted florets, lightly recurved. Holds 8 to 10 open on long spikes, stretchy flower heads making up somewhat for the lack of floret size. We like it and we think you will too.

Price—L 75c—10/\$6.00; M 50c—10/\$4.00;
S 25c—10/\$2.00

WEDGEWOOD (Fischer 47)**80 days****366**

An interesting and delightful lavender with a cream throat. One cannot help but like Wedgewood—it's so clean and appealing. Somewhat of the miniature type, particularly as to growing habits, but a little too large in size to be classed as a miniature. A good show glad

and a good commercial, where you can use the smaller sizes. An easy propagator—healthy—four to six open on medium tall wiry stems.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

WHITECLIFFE (Goddard 49) 80 days 501

An extra large white with its huge florets well attached on a tall straight spike. A violet line on a cream throat places it in the Ol class. Florets are ruffled. Nice performance all around.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

WHITE GODDESS (Roberts 48) 80 days 500

A good white, consistent in growth and easy to handle. The throat is a cream color, but not too prominent. Six or more open on good tall straight spikes—well proportioned. Florets are ruffled enough to be very attractive. Healthy, good propagator and a good all around performer. Good commercial and fair show prospect.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

WHITE LACE (Fischer 51) 70 days 300

It's a toss up between Cupid and White Lace for an early white. Both are on the small size, but I think White Lace takes it for its beauty. Immaculate white with just a bit of ivory in the throat. A waxy texture adds a glisten to the floret that is hard to beat. Ruffled to perfection. Spikes are only medium tall, stiff, but are well proportioned and always straight. Holds four to six open. Good all around. Particularly good for corsage work. You will like White Lace.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/25c—10/50c; B Pkge. 25c

YELLOW HERALD (K&M 47) 80 days 411

Tall straight spikes of an amber yellow shade — a touch of carmine in the throat. Not as pretty as Spotlight, but useable for floral work. Holds six or more open—good attachment nice balance.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

B U Y A M E R I C A N G R O W N B U L B S

Miniatures

We have listed these likeable little ones separately again this year to enable you to more easily select those you like.

The shows are beginning to recognize more and more, the value of the miniature classes and the hybridizers are bringing out some nice ones each year. We now have a full line of colors to compare favorably with the larger sized varieties. To the lady interested in arrangements we offer the possibility of the miniature glad—colors of your choice, odd shapes, face-up styles, ruffled, almost anything you want.

It takes a few more spikes of the miniature glads to get the effect you might get from one or two of the large ones, but they work in so nicely in the arrangements — they just seem to belong. We would suggest that you order a number of each variety, rather than one or two, for you will be better satisfied. Miniatures will also prove very useful for foundation or spot planting in the garden. Try a dozen scarlet Atom, or orange Flicker, or even dark red Fifth Avenue and see what a nice effect you can get.

ATOM (Hedgecock 46)

80 days

236

One of the best of the miniatures — well liked by everyone, the arranger and the florist. Bright scarlet florets, each petal edged with white — an attention getter everytime. Four or five florets open at one time on a wiry medium tall spike. Propagates easily from bulblets. Large bulbs have a tendency to split unless de-eyed. Its bright attractive color seems to carry on through in hybridizing work. You will like Atom.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

BABS (Pruitt 45)

68 days

210

A light yellow that is well liked. Six open on medium tall straight spikes. A greenish cast to the buds gives an inkling that it might hybridize into green. Well proportioned spikes, plenty of bud color—enough ruffling to make it attractive. Excellent for corsage work where its size is nice. Carries much of its color and ruffling to its seedlings. Recommended for all around use.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

BABY BUTTERFLY (Cormack 56)

75 days

224

Baby Butterfly finally ended up being classed as orange, but either orange or salmon could be used. The lower petals are a light yellow and blend gradually to an orange salmon in the upper petals. One of the nicer ones, with a slender wiry medium to tall spike that is well able to hold the six that are usually open at one time. You should like Baby Butterfly.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;

S 25c—10/\$2.00; B 5/26c

BASHFUL (Kuhn 42)

90 days

190

A mixture of lavender and cream, shading to a yellow throat, with a deep red blotch adding color. Typically miniature in performance—

four or five open on medium tall wiry spikes. A refined quiet type, well named.

Price—L 2/30c—10/\$1.20; M 3/30c—10/80c;
S 5/25c—10/40c

BLUET (Brown 37) **75 days** **280**

Between a blue and a lavender in color with a medium to dark yellow throat, with somewhat of a smokie appearance. A light peppering of lavender in the throat, completes the ensemble. Sprouts badly in storage. Four open in typical wiry miniature spikes.

Price—L 2/30c—10/\$1.20; M 3/20c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

BONNIE PRINCE (Barker 55) **80 days** **262**

Wide open florets of a medium shade of rose makes Bonnie Prince an attractive useful miniature. Six florets, well spaced and well placed on medium tall wiry spikes, enough height to be useful in arrangement work. Propagates easily. An attractive color and its other excellent qualities make it very useful.

Price—L 40c—10/\$3.20; M 30c—10/\$2.40;
S 2/30c—10/\$1.20; B 10/25c

BONNY (White 50) **85 days** **230**

A very clean light salmon, with only a small diffused rose blotch in the throat, a combination of colors that matches well. A white dart in the throat just seems to add more to its good looks. Holds 6 open on medium tall spikes of up to 18 buds. A nice performer.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

BO PEEP (Butt 48) **65 days** **231**

A good miniature to have in your garden—light salmon pink, a little on the buff side, with a yellow throat. There is a peppering of red in the throat. Floret is very heavily ruffled. Color is useful in many ways, shows, arrangements, corsages, etc. Performance is good, medium tall spikes with good balance and proportions.

Price—L 2/30—10/\$1.20; M 3/30c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

CLAUCARCY (Maynard 52) **87 days** **241**

Somewhat better performance wise than the usual miniature and at the same time an attractive color. A nice clean pink, a cream throat with white mid-ribs — quite pleasing in overall effect. With six to eight open on a 20 bud tall wiry spike, there is always the possibility that it can win better than the usual blue. Attractive enough in color alone to make you want it.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

CORAL BELLS (Clark 30)**70 days****136**

A tiny coral pink floret—a yellow throat peppered with red dots—a floret that rates among the smallest grown, and yet it is quite nice. Frequent winner for the smallest floret at the shows. Holds four to six open on long wiry stems. Very nice and well liked.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

CRINKLETTE (Butt 41)**70 days****224**

One of the nice ones from Mr. Butt. Deep orange, with a yellowish cream throat on which is an attractive red feather. A nice color combination, put up in a beautifully ruffled dainty floret. About six open on medium tall spikes. Nice balance and good performance.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

FAIRY (Kuhn 46)**75 days****266**

A light lavender, slightly hooded miniature—a rather interesting color and quite useable. Four to five open on medium tall wiry spikes. The color is almost uniform over the whole floret. Seems to be well liked.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

FAIRY FANCY**64 days****206**

An unusual glad—light cream in color, with florets that are heavily lacinated. A red line down the middle of the throat also adds to its attractiveness. Will hold three or four open on medium tall wiry spikes. Its unusual shape works handily in arrangement work where it is desirable to have a change of shape or texture. Quite early.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

FIFTH AVENUE (Hedgecock 51)**85 days****254**

Classed as dark red but possibly a shade or two lighter than dark red — certainly not a black red. It has a velvety texture that takes it out of the dull class — its glisten or shine does a lot to make it attractive. Holds four to six open on medium tall straight spikes that are well balanced. Propagates well. All told—well liked.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

FIGURENE (Butt 51)**68 days****217**

A combination of apricot and brown, an ideal color combination for fall arrangements. Considerable ruffling helps give it a crisp look. Six open is the rule on medium tall straight spikes. Only a fair propagator—its main fault. Placement, attachment and substance excellent. Worthy of a trial in any garden.

Price—L 2/35c—10/\$1.40; M 2/25c—10/\$1.00;
S 3/25c—10/80c; B 20/25c

FLICKER (Kuhn 46)**75 days****221**

Everyone seems attracted to Flicker—the usual comment—Oh! how nice. Orange with a bright yellow throat and a scarlet blotch in the throat. An interesting color combination—quite attractive and very useable. Four to six open on medium tall wiry spikes—very nicely balanced. A good color combination for arrangements. One of our top favorites for performance and color.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

FROLIC (Bork 53)**80 days****213**

Deep yellow with a sparkle to it—an eye catching scarlet marking in the throat — always an interesting combination and particularly so in this case. Holds five to seven florets open on a medium to tall wiry spike, straight with a well proportioned flowerhead. Healthy, good propagator and very attractive.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 20/25c

DRACOCEPHALUS (Species)**75 days****190**

Never enough of this variety to go around, probably because it is hard to propagate. Unusual in many ways, first in color and then in shape. Small florets, rather narrow in shape, with a pointed top petal hooding or shading the rest of the floret as if to protect the pollen. There are some dull purple spots in the throat but the hood keeps them well hidden. Yellowish green in color, an odd but yet attractive color, definitely on the green side. Seldom holds more than three open on a 12 to 15 bud spike that is medium tall and wiry. Very hard to propagate, the bulblets are small and hard shelled. We have been able to propagate by starting in the greenhouse at least two or three months before we can put them outside. We seldom get more than a six from such growing and it is usually two years from a six to a No. 1 bulb. Does not hybridize very easily. Well liked for arrangement work where its color is very useful.

Price—35c—10/\$2.80 large size as long as stock lasts.

GOBLIN (Butt)**85 days****242**

A heavily ruffled clear pink miniature, supplemented with a nice attractive yellow throat. Medium tall spikes, that easily hold the six to seven open florets with a nice balance to the rest of the spike. Better than the ordinary run of pinks. Blooms easily and you get a nice spike from the smaller sized bulbs.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 25/25c

GREEN THUMB (Butt 56)**60 days****212**

We are inclined to class Green Thumb as yellow with a greenish cast, rather than green. Ruffled florets of heavy texture, six to eight open on medium tall spikes of very nice proportions. Grows very much like Babs, except it is definitely more green in color. Buds particularly show a green cast.

Price—L 50c—10/\$4.00; M 35c—10/\$2.80;
S 25c—10/\$2.00; B 10/40c

ITO (Brown)	75 days	120
--------------------	----------------	------------

Ito is always a candidate for the smallest floret at a show. A very useable color at any time, bright orange with a bright yellow throat — an excellent combination. Typically miniature in growth and performance, medium tall wiry spikes, about four open. Its tiny florets are very helpful in arrangement work to bring the size down and its color is delightful.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

JINGLES (Lins 49)	93 days	230
--------------------------	----------------	------------

Somewhat erratic in growing habits, but otherwise very nice. Florets are heavily ruffled, with the petals somewhat pointed. A pretty salmon color with a white throat. Medium tall rather heavy spikes that hold as a rule six open. A nice arrangement glad and a good one for corsage work. Rather slow propagating.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

KEWPIE (Brown 30)	68 days	150
--------------------------	----------------	------------

Another of the tiny ones, light red with a picotee edging of gold. Very small florets, somewhat hooded but not enough to hurt the beauty of the floret. Medium tall wiry spikes hold about five open. A very useful color for arrangement work. An easy propagator.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

LITTLE GIANT (Whitby 48)	57 days	232
---------------------------------	----------------	------------

Lacinated ruffled orange buff colored florets with a very bright yellow throat. Extremely early. Might be a good one to hybridize with for earliness. Holds about five open on a medium tall wiry slender spike. Quite an attractive color combination.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

LITTLE GOLD (Fischer 50)	80 days	220
---------------------------------	----------------	------------

Officially listed as orange and that is probably where it belongs, but somehow, it gives one the impression of gold. Extra nice ruffling makes Little Gold very useful for corsage work. It will only hold three or four open at one time — a handicap, but not for corsage work. The spike too, is somewhat on the short side. In spite of its faults we like it very much for its color and beauty.

Price—L 2/30c—10/80c; M 3/25c—10/80c;
S 5/30c—10/80c; B Pkge. 25c

LITTLE KING (Vastures 51)	80 days	252
----------------------------------	----------------	------------

A very clean medium red color with an attraction that is hard to resist. Quite a useful color and with its good performance, it is nice.

Holds five to six open on medium tall wiry spikes.
Price—L 2/25c—10/\$1.00; M 3/30c—10/80c;
S 5/25c—10/40c; B Pkge. 25c

LOVELINESS (Koerner 42) 75 days 140

Just a lovely glad — Loveliness is a good name for a nice one. Small, but not tiny, shrimp pink in color, shading gradually to a white throat. The pink is a delicate shade and the combination is lovely to look at. Three or four pointed petals will open at one time on a medium tall wiry spike. A good arrangement glad when working for a tint in pink.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

LOVELY MARY (Troyer 50) 80 days 232

We hope we have enough stock of Lovely Mary this year to supply the demand. A lovely very clear salmon color, offset with a nicely colored yellow throat. Much better than average miniature performance — 6 to 8 open on a spike that will hold 24 to 26 buds. Spike is tall and well proportioned. Quite nice.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

MARCUS (Stevens 49) 60 days 106

One of the tiny ones too — creamy white with a touch of yellow in the throat. Five florets open on a medium tall wiry spike. The color is clean and very attractive — not a muddy cream but a white cream. Its size is such as to make it a contender for tiniest floret in the show. We like Marcus very much and I think you will too.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

MARIONETTE (Butt 49) 75 days 213

Yellow on the dark side, flushed red, with a large red blotch in the throat. The six florets usually open are nicely ruffled, and are well distributed over the medium tall spike. Bulbs are much inclined to sprout in storage and they are inclined to split in the field. Bulblets are rather hard to germinate, but for color and performance, you will like Marionette.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

MISCHIEF 232

A beauty from "Down Under". A wide open flaring type of floret, laying flat against the spike. Intensely ruffled and crinkled. Six to eight florets open at one time. Deep salmon in color bordering on the red side, a white throat embellished with a large pleasing red mark, which feathers out into the white throat. Spike is medium tall and straight, placement is good. Our blooms were all from small

bulbs and the results should be far better from large bulbs. Our stock is very limited and we can only sell one bulb to a customer.

Price—Any size Bulb \$2.00—limit one to a customer.

MURIELAE ACCIDANTHERA

Who says that gladiolus have no odor. They have never tried Murielae Accidanthera. Something quite different from the usual gladiolus, originating in Abyssinia. The florets are bluish white, with a blotch of dull purple, and bronze stemens. The florets are carried on 6" pedicels. They bloom hanging face down. About three or four open on medium tall wiry spikes. The star shaped floret makes up nicely in a corsage. One spike tucked into a bouquet will perfume the whole room. Bulbs do not grow much larger than a quarter, most of them about the size of a dime. Handle just like any other glad.

Price—5/25c—10/40c large bulbs as long as possible.

NADIA (Leffingwell 37)

90 days

231

Twenty years old and still holding its own. In fact a well grown Nadia is hard to beat on the show table. Can hold up to eight open on tall wiry spikes which at times have a tendency to crook. Upper petals are bright salmon in color with the lower petals a deep yellow. Somewhat hooded florets but not bad. Stands the heat well, but will crook worse in hot weather. Makes very nice bulbs and propagates well.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

OCEAN SPRAY (Baerman 46)

75 days

207

Creamy white in color, with a beautiful amber colored throat — a beautiful combination of color. Four to six open on medium tall wiry spikes. Clean and appealing — you will like it from the start. Not too well known but worthy of wide distribution.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

ORANGE BUTTERFLY (Salbach 27) 90 days

222

A small decorative glowing bronzy orange, holding as many as eight or ten open on tall wiry spikes. Lip petal is deep yellow and has a red line on it. An old timer, but still good keen competition for some of the newer ones on the show table. For hybridizers, this is before Picardy and makes a good starting point.

Price—L 2/25c—10/\$1.00; M 2/15c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

OSAGE (Brown 35)

80 days

236

A fine color, a clean cut scarlet that you like the minute you see it. Five to seven open on typical miniature spikes. An easy grower, a good propagator—keen competition on the show table and well liked for arrangement work. Well worthy of a trial.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 10/40c; B Pkge. 25c

PATTY BERG (Koerner 42)**90 days****162**

Very small — a contender for the smallest floret at most shows. Deep rose, suffused with white, and with a silvery edging. An excellent color combination — we class it as pretty. About four open on wiry spikes.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PELLETIER D'OISY (Lemoine)**60 days****290**

Definitely on the green side with an edging of greenish orange, and an orange stippling over the floret. One of the most wanted flowers in the field at show time—never enough to supply the demand. Holds about four open on a medium tall wiry stem. Its unusual color is its main attraction working very nicely for arrangement work. A slow propagator and stock is never too plentiful. If you like to make unusual arrangements, by all means get a few Pelletier D'Oisy.

Price—L 20c—10/\$1.60; M 2/25c—10/\$1.00;
S 4/25c—10/50c

PERKY (Hubler 42)**85 days****236**

Scarlet petals, shading to a bright scarlet in the throat. Petals have a rolled appearance. Six or more florets open on medium tall wiry spikes. Seems to predominate both as to size and color when used for hybridizing. An easy propagator.

Price—L 2/25c—10/\$1.00; M 2/15c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

PETER PAN (Butt 50)**75 days****233**

One of the good ones from Mr. Butt. Orange red to our way of thinking, actually classed a deep salmon color which darkens considerably in the throat. The color works exceptionally well with drift wood or dry materials in arrangements. A nice show glad too — six or seven open on tall straight spikes. Florets are ruffled nicely. Very good in all ways.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PICCOLO (Koerner 47)**63 days****101**

A small creamy white face up with a prominent reddish purple mark in the throat. An odd, impish attractive spike, tall, wiry, with about four open at a time. Takes a little more than ordinary ingenuity to use in arrangements, but is startling when correctly used. An easy propagator from its extra large bulblets.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

BUY AMERICAN GROWN BULBS

PINK RIBBON (Spencer 42) 90 days 242

Our florist trade took Pink Ribbon right along with the larger sized glads all season. Light pink — a cream colored throat — six to eight open on tall straight spikes — literally a ribbon of pink. There is a light peppering of red in the throat, but not enough to hurt the overall beauty. Propagates easily, grows well, excellent attachment and placement. Recommended.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

PINT SIZE (Evans 54) 70 days 166

Lavender with a creamy white throat — easily keeps in the 100 size — seldom grows oversize. Six to eight open on medium tall straight spikes. Will hold 16 to 18 buds and still make a nicely balanced spike. Placement, attachment, facing and performance all very good.

Price—L 25c—10/\$2.00; M 2/30c—10/\$1.20;
S 3/30c—10/80c; B 15/25c

QUEEN OF BREMEN (Simmer 28) 75 days 268

Nearly thirty years old and still one of the best of the miniatures. Rosy lavender, more on the lavender side, about six open on wiry spikes. Has a tendency to crook in warm or hot weather. Parent of many of today's good ones.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

RUBY (Kuhn 46) 70 days 252

A gem of color—medium to dark red, with a shine or glisten to it that attracts your attention immediately. Holds five to six open on a medium tall wiry spike. Somewhat hooded, but not enough to detract in any way. For hybridizers working in red, Ruby will transmit red most all of the time. It also seems to keep the size down when used with the larger varieties.

Price—L 2/25c—10/\$1.00; M 4/30c—10/70c;
S 5/25c—10/40c; B Pkge. 25c

SKALAWAG (Butt 53) 80 days 242

A likeable little Skalawag is the best description of this one. Pink and yellow — heavily ruffled florets. Pink, on the dark side, with a clean yellow throat. Looks like it could be a winner — well liked just for itself. Medium to tall spikes nicely balanced.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

B U Y A M E R I C A N G R O W N B U L B S

SONOPAL (Van Voorhis 53)**70 days****261**

Medium, almost light rose in color with the crimson throat marking shading it towards the darker rose. Six open—attractive coloring. Spikes are medium tall and well balanced.

Price—L 2/35c—10/\$1.40; M 2/25c—10/\$1.00;
S 3/30c—10/80c; B 20/25c

STARLET (Baerman 44)**70 days****200**

We have never been able to get but four or five florets to open at one time on Starlet — but whatever we get is well worth the effort. A sparkling extra clean white — a light and airy appearance on the spike due to somewhat wide spacing of the florets. Very useful for corsage work where its waxy texture and light frilling do wonders for a corsage. Early, healthy, very nice all around.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

STATUETTE (Butt 50)**65 days****213**

An early miniature yellow with a reddish purple throat marking, hidden largely by the frilling or ruffling of the floret. An attractive color combination. Five to six open on medium tall wiry spikes with good placement attachment and propagation. Well liked and worthy of your attention.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

TAURUS (Kundres 25)**60 days****270**

A fine velvety purple with a darker colored throat. Four to six florets open on typical miniature spikes and performance. Quite early. Old but good.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;
S 5/30c—10/50c; B Pkge. 25c

TRUDY (Platell 57)**75 days****250**

An unusual combination of reds, from light to dark put up in an attractive package. Upper petals are mandarin red — the lower petals are the same shade of red on the outside, but shade to a blood red color on the midribs. A light yellow line on the midribs of the lower petals adds color and sparkle to the floret. The lip petals are edged with a fine narrow edging of gold. Six open on medium tall wiry spikes. Will average 15 to 16 buds but may do better. An attractive color and well liked.

Price—L \$1.00—10/\$8.00; M 75c—10/\$6.00;
S 50c—10/\$4.00; B 10/50c

Growers Unit—

10 L, 10 M, 10 S—500 Bblts., \$25.00

TWINKLES (Butt 48)**70 days****232**

Still as pretty and popular as it was ten years ago. Salmon florets with a yellow throat. A heavy red feather on the yellow throat mark adds more than a little to its overall beauty. Florets are rounded, but nicely ruffled. Five to six open on medium tall spikes of excellent balance. A good consistent performer — you can be sure of results with Twinkles.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

VIOLA (Kuhn 42)**75 days****279**

One of the best in the dark violet miniatures. Dark violet with a deep red rose blotch in the throat. Works in the Violet red color spoke nicely. About four to five open on medium tall wiry spikes. Not a world beater but one of the best in a weak color class.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

YELLOW BIRD (Kuhn 46)**80 days****212**

Here is another miniature that the florists take without hesitancy. A consistently good performer with a medium yellow floret — up to eight open — tall wiry spikes. If some of the larger sized yellows would perform as well as Yellow Bird, we could solve one of our problems for a good yellow. The florets are round, slightly recurved and of a nice shade of yellow. A very good show glad.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

ZONA (Kaylor 27)**65 days****242**

Deep salmon pink with a yellow throat and a diffused pink blotch. Excellent overall — 5 open, typically miniature performance.

Price—L 2/30c—10/\$1.20; M 3/25c—10/80c;

S 5/30c—10/50c; B Pkge. 25c

Home Gardeners Special

Many nice compliments on this special last year leads us to make a similar special this year. Designed for the home gardener who wants some nice blooms for the home — not necessarily show winners but a little better than the average mixture. You select any ten varieties — we ship ten of each, all labeled.

100 Large bulbs — ten varieties, ten each kind \$8.50

100 Medium Bulbs — ten varieties, ten bulbs of each \$5.50

Atlantic—coral red
Aureole—yellow
Beauty's Blush—blush pink
Betty Duncan—nice orange
Burma—dark rose
Catherine Beath—yellow
C. D. Fortnam—flashy pink
Cupid—early white
Dieppe—scarlet
Dolly Varden—large salmon
Elizabeth the Queen—lavender
Elmers Rose—nice rose
Evangeline—pastel pink
Florence Nightingale—white
Francesca—tall lavender
Friendship—nicest of the pinks
Gaylore—deep pink
Gene—early yellow
Gold—golden yellow

Write us for prices on quantities larger than one hundred. 25 bulbs may be purchased at the 100 rate.

Garden Mixture

Last year again found our GARDEN MIXTURE very popular. This is a mixture that is made up as your order comes in. If you want light colors, dark colors, miniatures, or a combination of any of them, just tell us so and we will make up accordingly. None of the varieties will be named and they will be all mixed together in a bag. You will find them clean bulbs, healthy and ready to produce a nice assortment of flowers for you during the entire blooming season.

Just the thing if you want some nice glads but do not want to take the care to keep your varieties separate.

Price—100 large bulbs \$5.00—50 for \$2.75—25 for \$1.50
100 medium bulbs \$3.00—50 for \$1.65—25 for \$1.00

IF YOU WANT YOUR MIXTURE OF MINIATURES ONLY,
PLEASE BE SURE TO MARK THE ORDER THAT WAY.
